

How to Use Online Databases of the Library by VPN Connection

All HOSEI students can access to the Hosei University Library online databases from their home internet access by VPN connection.

<https://opac.lib.hosei.ac.jp/opac/myopac/gateway/?lang=1>

“FortiClient VPN” software application is needed to use VPN connection.

To install the software application, please follow the instructions below:

<Download and install of “FortiClient VPN”>

Windows 10・11 users:

Please refer to the following manual (English).

https://netsys.hosei.ac.jp/protected/manual/vpn/files/VPN_Manual_Windows10_11_English_forti.pdf

MacOS users:

Download the “FortiClient VPN For Mac OS”.

iOS users:

Open the App Store and then search for “FortiClient VPN”. Then download the “FortiClient VPN”.

Android users:

Open the Play Store and then search for “FortiClient VPN”. Then Download the “FortiClient VPN”.

For your reference, the install manuals for VPN connection in Japanese are available from the website. Unfortunately, there are no English manuals at this moment except for the Windows manual. however, it may help you since there are many pictures on it. Students can download those manuals from the following web site:

<https://netsys.hosei.ac.jp/protected/manual/vpn/manual-vpn-f.html>

If you have any troubles with installing “FortiClient VPN” or VPN connection from home, please consult with the User Support Office (English/Japanese):

net-uketsuke@ml.hosei.ac.jp

*It may take time to reply for a few days.

*Attaching screenshot of your PC/devices will help the staff to understand the errors/troubles.
